

Single Sided Release Paper

Specialty Product

Single Sided Release Paper is a 72µ (2.8 mil) bleached Kraft release paper coated on one side with siliconized polyethylene. Grid Release Paper (GRP) has a grey grid pattern on the reverse.

Typical Applications

- Used to cover exposed adhesive and is useful for when trying to apply an oversize film to a substrate on a roller laminator.
- Acts like a carrier and stops the adhesive from sticking to the laminator rollers.
- Can be used in Drytac HotPress or roll laminators.

Product Structure

Film	Not Applicable
Adhesive	Not Applicable
Release Liner	1 Side PE Coated Siliconized Kraft Paper

IMPORTANT NOTE:

Information is intended only as a guide and is given without guarantees. Purchasers should independently determine, prior to use, the suitability of each material for their specific purpose. Follow the indications on the package, ask for the safety data sheets and always follow the indications contained therein.

Only the correct use of the product will allow satisfactory results. For this reason, Drytac is not responsible for improper use of the product, either by application or substrate applied to. Make certain that product is right for the desired use, and work according to the instructions given in our technical data sheets. If in doubt of the appropriate application methods or use, contact Drytac at one of the phone numbers listed below.
